

## MedFax Provider Spotlight® Producing Real Time, Advanced Data Solutions for Credentialing Workers' Compensation Providers

With over 900,000 physicians currently practicing in the United States, sanction data must continuously be updated to keep up with new exclusions, fines, citations and disciplinary actions issued daily. More than ever, there is a crucial need for insurance carriers to have a dynamic data solution to help properly credential potential providers and monitor current providers, while answering key questions such as:

- Is my organization compliant with government monitoring mandates?
- Does the doctor have an active license?
- Do they have a sanction on their license?
- Has the doctor been the subject of a federal investigation by the FDA, DEA or OIG?

### MedFax Provider Spotlight® has the Answers

*It is estimated more than 41 percent of physicians in the U.S. hold licenses in multiple states. It has also been shown that physicians with multiple licenses are 228 percent more likely to be sanctioned than physicians licensed in a single state.*

With MedFax Provider Spotlight, insurance carriers access a complete, historical and national database for all Federal and State records, monitoring provider exclusions dating back up to 35 years. Spotlight provider data is unified into a single, simple NPI profile for your organization to account for a total license vista.

### Developing an Accurate, Ethical and Credentialed Workers' Compensation Network

The 95 percent accurate Provider sanction database is designed to identify risk-averse Providers and exceed government and contractual mandates giving insurance carriers the ability to:

- Accurately manage the credentialing process, using primary source verification, and identify licensing issues
- Establish a base of compliance accuracy and sanctioning detection
- Review updated, real-time sanctions data with critical sources and evaluate alerts when a provider status changes
- Build an accurate, ethical and credentialed provider network
- Meet Medicaid, Medicare compliance mandates

## Continually Strengthening Provider Network Quality

To build a solid credentialing and monitoring foundation, it is essential for the data to be based on primary source verification. MedFax sanction data is aggregated from more than 20,000 primary sources including Provider sites, state medical boards, federal reports, government records and public sources.

## Identify Potential Provider Issues Before They Occur

Sanctioned and license-challenged Providers know the system and how to maneuver around checkpoints to continue practicing. MedFax data allows for analysis of data interaction to pre-identify even the most sophisticated of fraudulent Providers. MedFax Provider Spotlight mitigates payer risk by constantly improving the credentialing process through proper sanction and fraud identification.

## Identify Sanctions ‘At Time’ and Reduce Operating Expenditures

By using MedFax Provider Spotlight data, insurance carriers avoid costly fines, corrective action plans and compliance issues. Spotlight guards against false sanction-identification positives while also solving a myriad of monitoring and reporting requirements.

Spotlight is an on demand, data solution where the primary source is updated in real time and provider records are always available. Eliminate manual searches and ongoing database administration to increase operational efficiency.

## Delivering the Data You Need, The Way You Need It

MedFax Provider Spotlight is simple to integrate within any IT environment and system, with solutions provided as a Software-as-a-Service, in a Cloud, as flat files, and APIs.

The need for accurate and real-time data is crucial as government compliance focuses more on provider directory accuracy and sanctions monitoring. MedFax provides the solutions, simply and seamlessly, while reducing the potential of costly fines and sanctions due to licensed-challenged providers.
